

## Accessing the new Spydus Library App

Download **Spydus Library** app from the Play Store (Android) or App Store (Apple), and install.

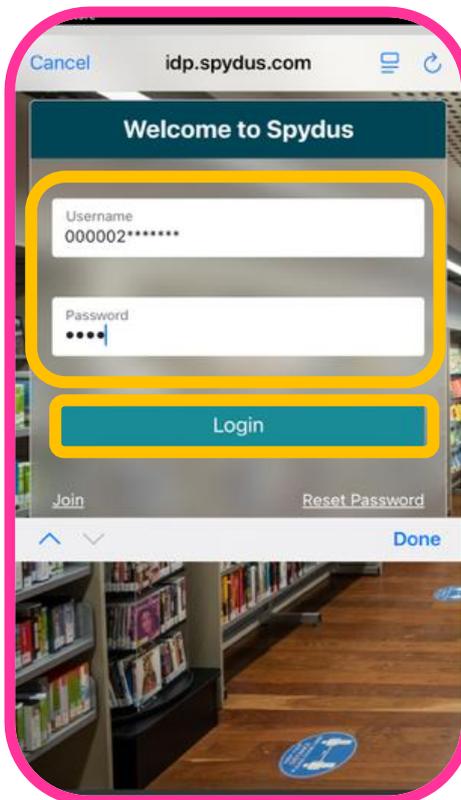

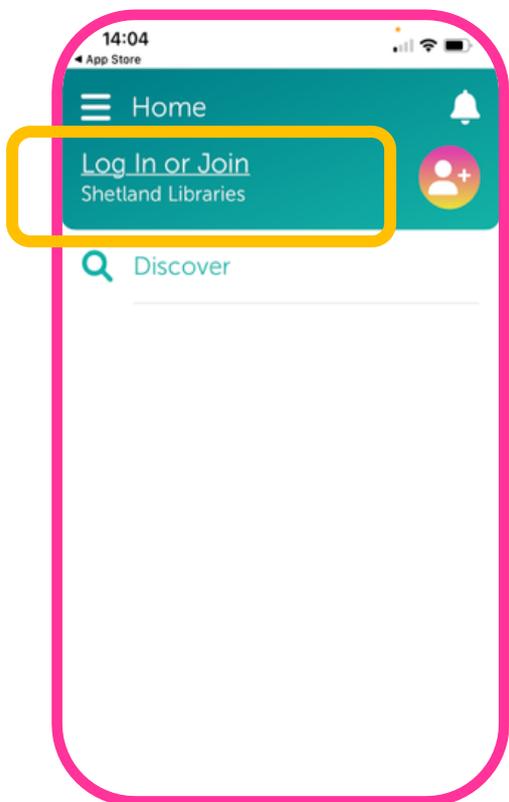

Allowing Notifications is up to you. Not allowing will not affect the basic performance of the app.

Once installed, select '**Select Library**' and search for **Shetland Libraries**

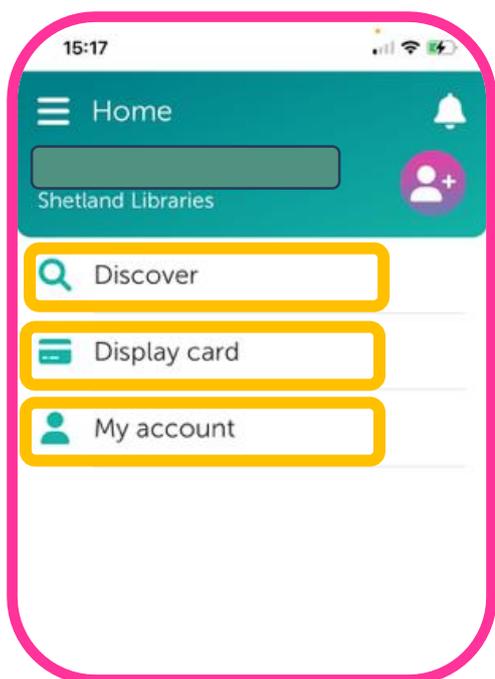

## Select 'Log In or Join'

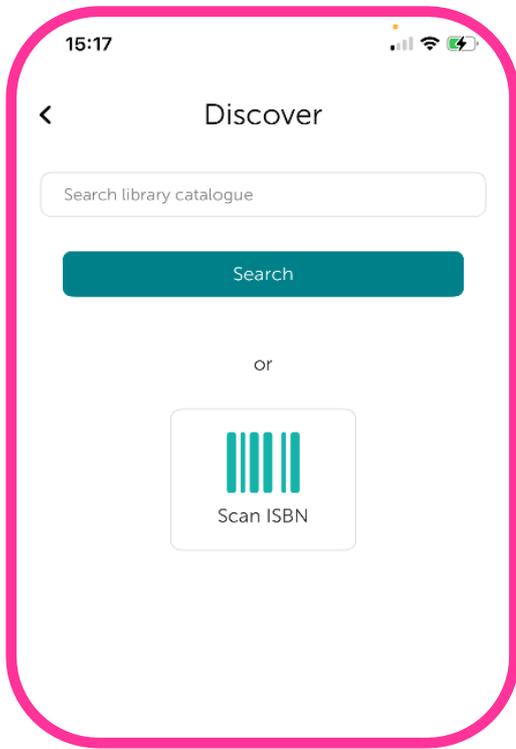

If you are already a member of Shetland Library, type in your **borrower number** and **PIN** and select 'Login'

If you are not a member of Shetland Library, select 'Join'. You will be taken out of the app to our online catalogue, where you can apply for a membership.

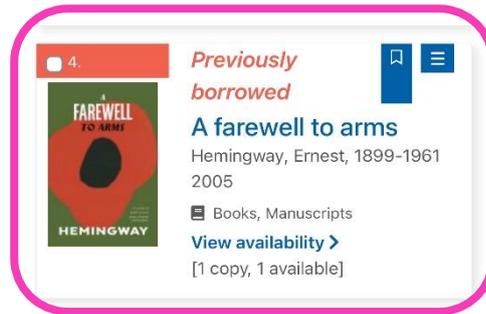

Once in the app, you will see **three menu options**

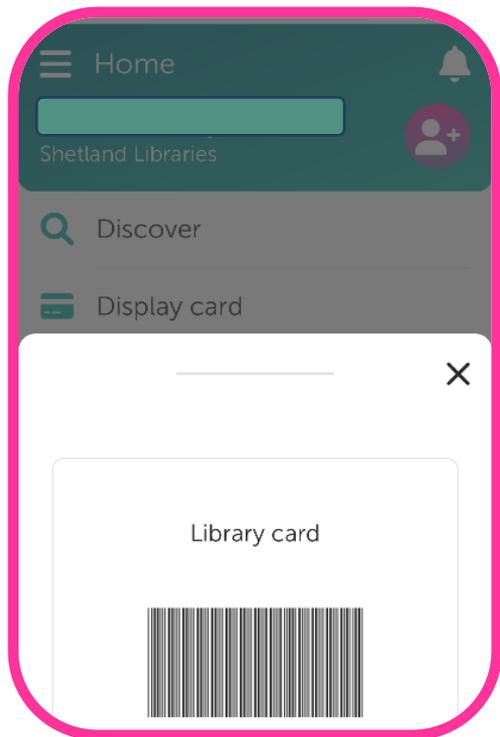

You can select **Discover**, to search for books on our catalogue, or to scan the ISBN of a book that you may wish to read. For example, if you scan the ISBN of a book you've found in a book shop or other library, it will let you know if we have it at Shetland Library already.

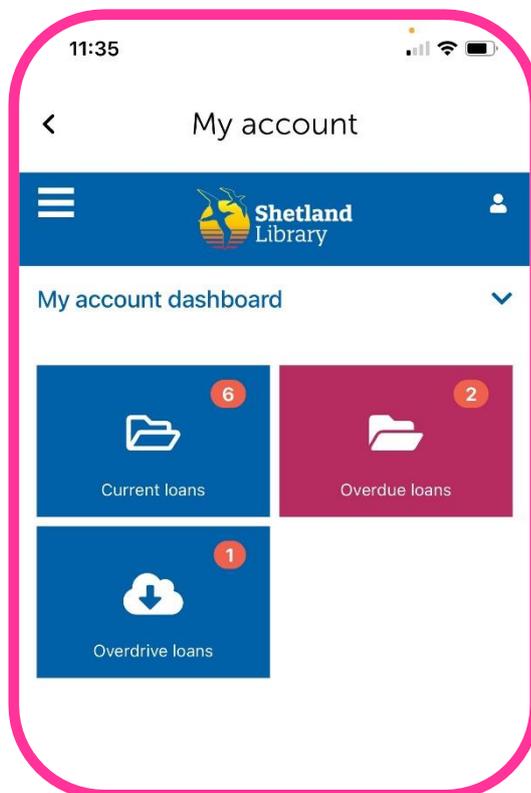

The app will also tell you if you have previously borrowed an item from the library.

Select **'Display card'** to bring up your library card number and scannable barcode on screen. Very useful if you forget to bring your card to the library.

Or choose **'My account'** to see what you have on loan, renew and request items.

We hope you enjoy our updated app.
