Weather

Observations are recorded in Shetland by staff employed by the Meteorological Office in Lerwick. There are also official Auxiliary Synoptic Reporting Stations in Fair Isle and Foula. Observations from the Lerwick Observatory began in 1921, although the first full year of recordings was not until 1922. (Lerwick Observatory: 60°08'N, 01°11'W. Wind vane 93m above sea level). The recorded meteorological observations from Lerwick Observatory for 2014 are as follows:

Temperature (°C) Lerwick

Ozone

Lerwick is one of only two stations in the UK where measurements of ozone are made, the other being Camborne in Cornwall. These stations are part of the Met Office's UK Upper Air Observing Network. Ground based Dobson Spectrophotometers are used daily to measure total ozone, the largest part of which exists in the stratospheric ozone layer (at a height of 8-30 km). At Lerwick ozone concentration profiles are also measured using balloon borne ozonesondes.

Total ozone levels are at their peak in the late winter and early spring. However, it is also at this time when man-made substances can lead to enhanced ozone depletion in the stratosphere. It is difficult to quantify these losses precisely since levels vary naturally by large amounts.

Stratospheric ozone acts as a shield by absorbing potentially harmful ultraviolet (UV) radiation which would otherwise reach the earth's surface. (It should not be confused with tropospheric ozone. Part of this is a pollutant formed in the lower atmosphere (troposphere) by the action of sunlight on other compounds such as those from car exhausts.)

High quality measurements over the last 20 years suggest a long term rate of decrease in total ozone over the northern hemisphere of between 5-6% per decade during spring.

Population

After decades of decline the population of Shetland, which had fallen to nearly 17,000 in the mid-1960s, rose by 31% between 1971 and 1981 as a direct result of oil related activity. In the early 1980s the population fell due to out migration after the end of oil construction activity and difficulties at Sumburgh Airport. In the latter half of the 1980s and the early 1990s the population level became fairly stable. Based on recent population estimates, and the 2011 census, the population continues to be relatively stable.

* Estimated

** From 1931 to 1971 the population figures for Scalloway are included in the figures for Tingwall.

*** In 1931, 1981 and 1991 the population figures for Cunningsburgh are included in the figures for Sandwick

+ From 1931 to 1981 the figures for Brae are included in the figures for Delting.

Populations were enumerated on a slightly different basis at the 1981 and 1991 Censuses, and are therefore not strictly comparable.

1981 Census – Resident Population **excluding** absent households.

1991-2011 Census – Resident Population **including** absent households

Economy and Industry

Economic Performance*

An economic survey conducted by University of Aberdeen Business School calculated the overall value of the Shetland economy – based on the combined total output of all economic sectors – to be £860,537,000 in 2003. A subsequent survey conducted by the James Hutton Institute calculated the overall value of the local economy in 2011 to be £1,091,421,269.

The same survey calculated Shetland's Gross Regional Domestic Product in 2011 to be £485,000,000 which equates to a GRDP per capita value of £21,556, up from £18,589 in 2003.

Marine Protection

The enforcement of UK and EU Common Fisheries Policy regulations is the responsibility of Marine Compliance – Scotland through inspections and observations by its protection vessels and sightings by surveillance aircraft.

The statistics below relate to activity in UK waters north of 59°30'N, and between 4°W and the UK/Norwegian median line.

Vessel Nationality	Fisheries Protection Vessel Boardings				Fisheries Protection Vessel Sightings				Fisheries Protection Aircraft Sightings

Tourism

Extract from Islands Visitor Survey 2012/13

The Islands Visitor Survey 2012/13 was conducted by Scotinform Limited and Reference Economics for the islands of Shetland, Orkney and the Outer Hebrides. Research was conducted between October 2012 and September 2013, and was carried out using face to face exit interviews, an online survey and a calibration survey.

Shetland Overview

Shetland attracted 64,655 overnight/day visitors in 2012/2013 (October 2012 – September 2013). By trip purpose, 41% were holiday visitors, 41% business visitors and 18% VFR. Total spend was £16 million.

Volume and Value 2013

Purpose	No. of visitors ¹	Average spend per trip (£)	Total spend (£)	% of total spend
Holiday	26,702	258	6,875,929	42
VFR ²	11,412	169	1,924,899	12
Business	26,541	279	7,415,345	46

Sullom Voe Oil Terminal

The terminal is situated at Calback Ness on a site of approximately 400 hectares (1,000 acres) on the shores of Sullom Voe, 46km (29 miles) north of Lerwick. BP Exploration Operating Company Ltd operates the terminal on behalf of companies participating in the regional pipeline groups. The terminal has a throughput design capacity of 1.2 million barrels of crude oil per day and reached a peak in 1984 with a total receipt of 439,434,656 barrels (58,328,785 tonnes), although throughput has declined in recent years.

In 2013 BP announced plans for a £100m overhaul designed to extend the life of the terminal to 2040, in light of the 3bn Schiehallion development and the £4.5bn Clair Ridge project which will utilise the terminal. It is expected that around 1,000 workers will be employed at the terminal over the next eight years.

In 2013 BP also announced plans to build a £500m gas plant to “sweeten” gas coming from both east and west of Shetland, taking out the hydrogen sulphide to make it ready for export via the Magnus field.

Shetland Gas Plant

The Shetland Gas Processing plant is part of the Laggan-Tomore project that is being developed by Total E&P UK and Dong E&P (UK). The project involves development of the Laggan and Tomore gas/condensate fields and construction of a processing plant to treat the gas produced from the fields. The plant will be operated by Total.

Work on the site began on 2010, with preparatory earthworks completed in 2011. This included two peat stores to accommodate the 65,000 cubic metres of material excavated during the pre-construction period. The main engineering, procurement and construction contractor Petrofac took over the site in October 2011 to begin construction activities.

A large accommodation facility capable of housing 848 workers became operational in 2012. This was then supplemented with barges and other accommodation in Shetland to house around 2,000 workers at the peak of the construction phase.

Once operational, the SGP will process and export produced gas and condensate carried ashore from the fields via two 18” pipelines. It will be capable of processing up to 500 million standard cubic feet of gas per day and employ around 70 people.

Water and Wastewater Services

Water and wastewater services in Shetland are provided by Scottish Water. Scottish Water is a public corporation created in April 2002 from the merger of the three predecessor water authorities: North of Scotland, West of Scotland and East of Scotland Water Authorities. Scottish Water is the fourth largest water operator in the UK with a turnover of almost £1 billion and five million customers. It operates within a regulatory framework set up by Ministers and involving independent regulators, the Drinking Water Quality Regulator (DWQR), the Water Industry Commissioner (WIC) and the Scottish Environment Protection Agency (SEPA). The Shetland Area office of Scottish Water (Duncan House) is located at Upper Sound, Lerwick.

Water Supplied (millions of litres)

1976	1981	1991	2001	2006	2007	2008	2012	2013	2014
2,627	4,964	4,691	4,104	3,994	3,914	3,840	4,242	4,203	4,440

Many thousands of water samples are taken throughout Shetland during each year. These are analysed and compared against a number of bacterial and chemical parameters as specified in the Water Supply (Water Quality) (Scotland) Regulations 1990.

Microbiological Quality (percentage compliance at W.T.W.S.)

1991	1998	2000	2001	2006	2007	2008	2012	2013	2014

Networks

		1999	2008	2012	2013	2014
Water connections:	Domestic	9,502	9,939	12,458	10,500	10,484
	Non-domestic	1,119	1,187	1,387	1,221	1,236
Sewer connections:	Domestic	6,701	6,938	10,841	-	-
	Non-domestic	712	761	1,301	-	-
Length of water mains (km)		1,005	1,017	1,080	998	1,020
Length of sewers (km)		365	372	309	300	297

Treatment

	1999	2002	2005	2006	2007	2008	2012	2013	2014
Wastewater treatment plants (incl. septic tanks)	60	64	79	81	81	83	80	81	81
Water treatment works (excl. re-chlorination stations)	18	18	14	14	14	13	10	10	10

Scottish Water maintains a programme for the decommissioning of small and inefficient rural waterworks and for the linking of these supply zones to larger works such as Lerwick (Sandy Loch) or Northmavine (Eela Water). This ensures better control of water quantity and quality.

Built Heritage

Buildings of Special Architectural or Historic Interest

Scottish Ministers compile lists of Buildings of Special Architectural or Historic Interest in order that such buildings may be identified and appropriate measures for their conservation can be taken. The list for Shetland is sub-divided into categories. Category A buildings are of national and international importance whilst those in Category C are of more local interest, of lesser importance or altered.

Sites and Monuments Record

Shetland Amenity Trust maintains the Shetland Sites and Monuments Record, a record of all the known sites in Shetland. The record is constantly expanding, both as the result of survey work being carried out by the Trust's Archaeology team, visiting universities, and reports from the general public. The record incorporates sites of all periods, up to and including the crofting period, the Second World War and the Cold War.

The current number of recorded archaeological sites is 8,189.

These include:	Broch/possible broch	141	Souterrains	27
	Burnt mounds	349	Military remains	445
	Chambered cairns	124	Fishing Stations	35
	Viking/Norse houses	70	Wheelhouses	8

Nature Conservation

Scottish Natural Heritage is the independent government agency responsible for safeguarding and enhancing Scotland's countryside and wildlife, and promoting the understanding and enjoyment of the natural heritage.

Statutory Conservation Sites in Shetland*

2 National Nature Reserves (NNR):	Herma Ness (Seabird Colony)	980.3 ha
	Noss (Seabird Colony)	313.0 ha

81 Sites of Special Scientific Interest (SSSI)

Geology – 33 sites	Marsh and Meadow – 7 sites	Rare Plants – 9 sites
Geomorphology – 7 sites	Limestone Grassland – 1 site	Seabirds – 18 sites
Montane Habitats – 1 site	Sand Dune Flora – 3 sites	Moorland Birds – 15 sites
Serpentine Vegetation – 4 sites	Trees and Woodland – 3 sites	Wildfowl – 2 sites
Other Heathland – 5 sites	Intertidal Habitats – 5 sites	Cliff Vegetation – 2 sites
Peatland – 5 sites	Aquatic Flora & Fauna – 8 sites	Mammals – 4 sites

Note: Some sites are notified for more than one feature of interest.

12 Special Protection Areas, covering 17 of the ornithological SSSIs have been designated under the EC Birds Directive. A further 12 sites comprising 11 SSSIs and 1 non-SSSI area have been designated as Special Areas of Conservation under the EC Habitats Directive.

Total area covered by statutory conservation sites is 19,846 hectares which represents 13.5 per cent of the total area of Shetland.

Approximate area coverage:

Foula – 2 sites	100%	Noss – 1 site	100%
Fetlar – 6 sites	70%	Mainland & uninhabited islands	
Fair Isle – 1 site	66%	– 43 sites (1 shared with Yell)	9%
Papa Stour – 1 site	79%	Yell – 8 sites (1 shared with Mainland)	4%
Unst – 15 sites	21%	Muckle Roe – 1 site	0.1%
