

Activity Sheet -

Create a soundscape or documentary!

Materials required: Dependant on choices made by group - video camera/voice recorder, imagination!

Materials provided: None.

Method: In groups create a soundscape of different recordings that helps to illustrate life on a croft. This could be a video or an audio recording, and could include interview clips from crofters, the sound of a crofter casting peats, or loading sheep into a flit boat. What sort of impression do you want to make? Do you want to make the recording sentimental, or to illustrate the hardships of a crofters life, or the dangers involved in a crofting/fishing lifestyle, or do you want to look at former croft life and today's croft life with nostalgia and good-feeling?

The video/recording could be documentary style, or creative - use your imagination!
