PHYSICAL CHARACTERISTICS

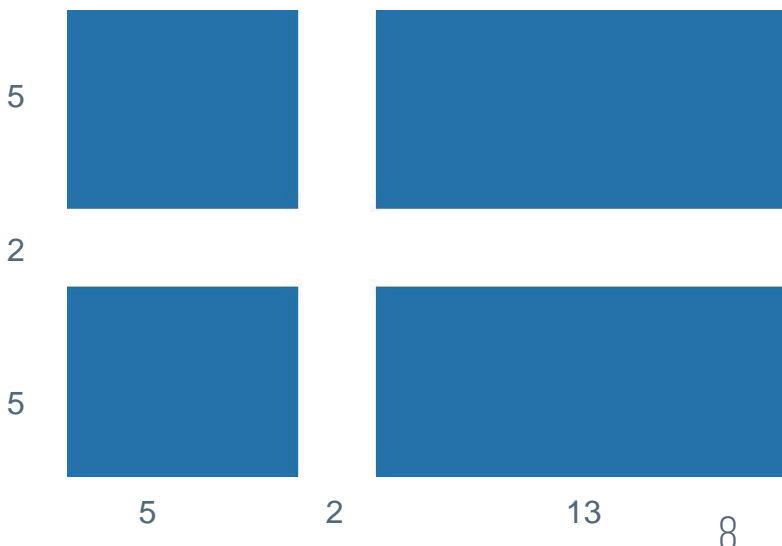

Shetland Flag Day 21st June

The flag of Shetland is a white Nordic cross on a blue background. The flag uses the colours of the flag of Scotland, but in the form of the Nordic cross in order to symbolise Shetland's historical and cultural ties with Scandinavia.

It was created by Roy Grønneberg and Bill Adams in 1969, to commemorate the 500th anniversary of the transfer of the islands from Denmark-Norway in the Kalmar Union to Scotland and the 500 years before as part of Norway.

The flag is widely used by Shetlanders both on land and sea, and is now seen as a symbol of the Shetland identity. In 2007 a "Shetland Flag Day" was introduced by the Council, to "celebrate all things Shetland". After almost forty years of unofficial use, the flag was formally granted by the Lord Lyon King of Arms, the heraldic authority of Scotland, on 1 February 2005, in time for the Island Games in July 2005 in Shetland.

Specifications of The Shetland Flag:
 Proportions 3:5
 Squares at hoist
 Arms of Cross = 1/6 flag height
 Colour: Blue Pantone 300

Observations are recorded in Shetland by staff employed by the Meteorological Office in Lerwick. There are also official Auxiliary Synoptic Reporting Stations in Fair Isle and Foula. Observations from the Lerwick Observatory began in 1921, although the first full year of recordings was not until 1922.

(Lerwick Observatory: 60 degrees 08'N; 01 degrees 11'W; wind vane 93m above sea level) The recorded meteorological observations from the Lerwick Observatory are as follows:

POPULATION CONTINUED

Between 2015 and 2016 Shetland experienced a 13.7% increase in the number of births, increasing from 234 in 2015, to 266 in 2016. The number of births in Scotland fell by 1.1%.

The total fertility rate in Shetland decreased from 2.02 in 2016 to 1.7 in 2017. Out of the 32 Council areas in Scotland, Shetland had the 8th highest rate in 2017 and this is higher than the rate of 1.47 for Scotland as a whole.

BIRTHS IN SHETLAND ISLANDS AND SCOTLAND					
	BIRTHS 2016		BIRTHS 2015		% CHANGE IN TOTAL NO. OF BIRTHS 2015-2016
	MALE	FEMALE	MALE	FEMALE	
SHETLAND	141	125	122	112	+13.7%
SCOTLAND	28,236	26,252	28,354	26,744	-1.1%

Source: National Records of Scotland

The number of deaths in Shetland decreased to 232 in 2016. Over the period 1996 to 2016 the overall death rate was higher for males than for females. Compared to Scotland over the period 1996 to 2016, Shetland had a lower death rate. The main cause of death in Shetland was circulatory disease, followed by cancer.

POPULATION CONTINUED

On average in 2015-16 there was a net outflow of 15 people from Shetland, meaning that less people entered Shetland (676 per year) than left (691 per year). The 25 to 29 year olds age group accounted for the largest group of in-migrants into Shetland. The largest group of out-migrants were 15 to 19 year olds.

AVERAGE MIGRATION IN AND OUT OF THE SHETLAND ISLANDS, 2013- 15*			
AGE GROUP	IN	OUT	NET
0-15	93	110	-17
16-29	247	254	-7

MARINE PROTECTION

The enforcement of UK and EU Common Fisheries Policy regulations is the responsibility of Marine Compliance - Scotland through inspections and observations by its protection vessels and sightings by surveillance aircraft.

The statistics below relate to activity in UK waters north of 59°30'N, and between 4°W and the UK/Norwegian median line.

Tourism is important to the local economy on Shetland, particularly for small businesses. The Shetland Islands Council, in partnership with VisitScotland, commissioned a biennial visitor survey to collect data to assess the sector. The next survey will be in 2019. The largest proportion of visitors to Shetland in 2017 were leisure visitors (51%). Approximately a third were visiting for business or work purposes, while 11% were visiting friends or relatives (VFR).

Age and gender

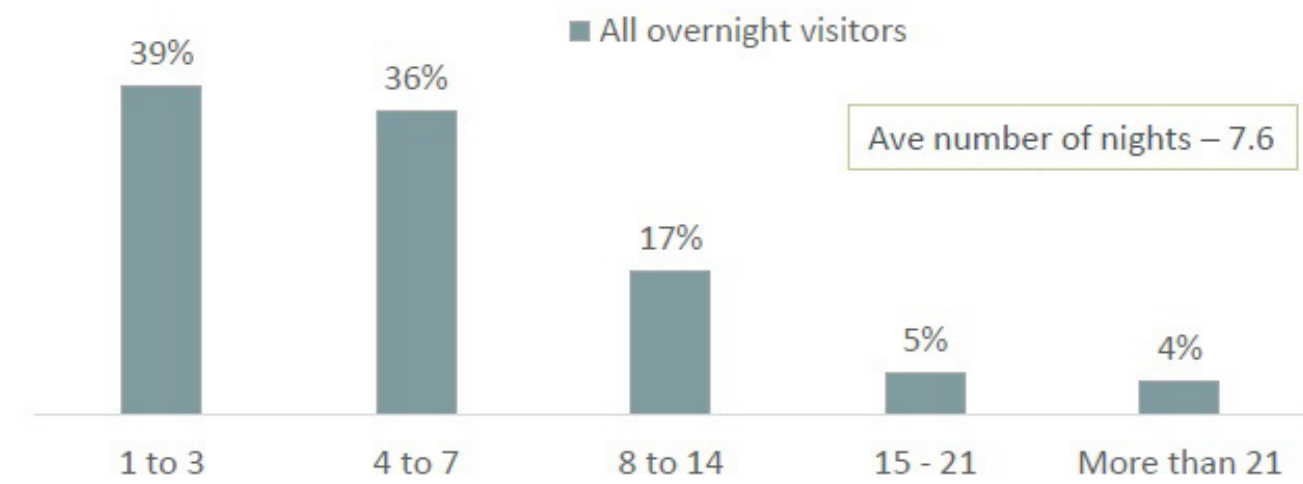

Origin – Leisure visitors

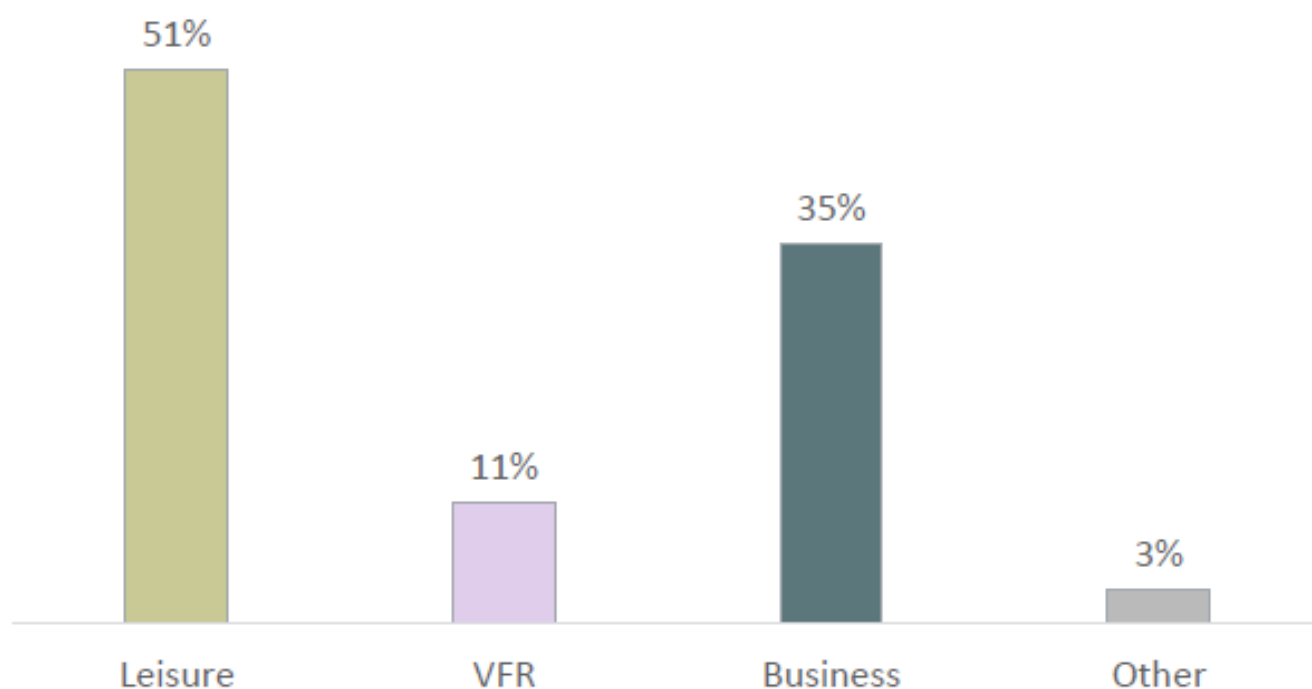

Base (All Leisure calibration): 1,329

Number of nights - Shetland

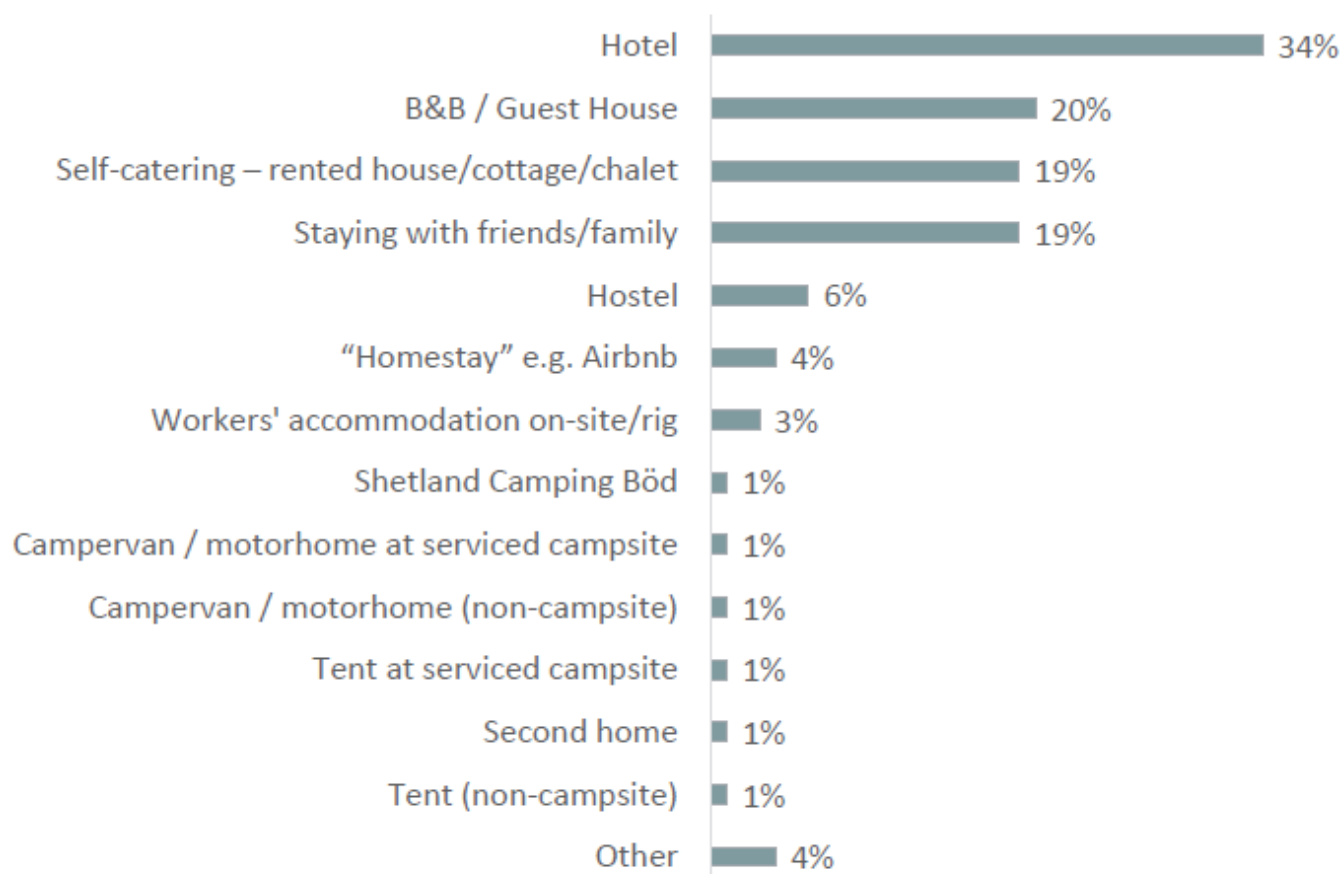

Trip Purpose

Base (All Calibration visitors): 2,434

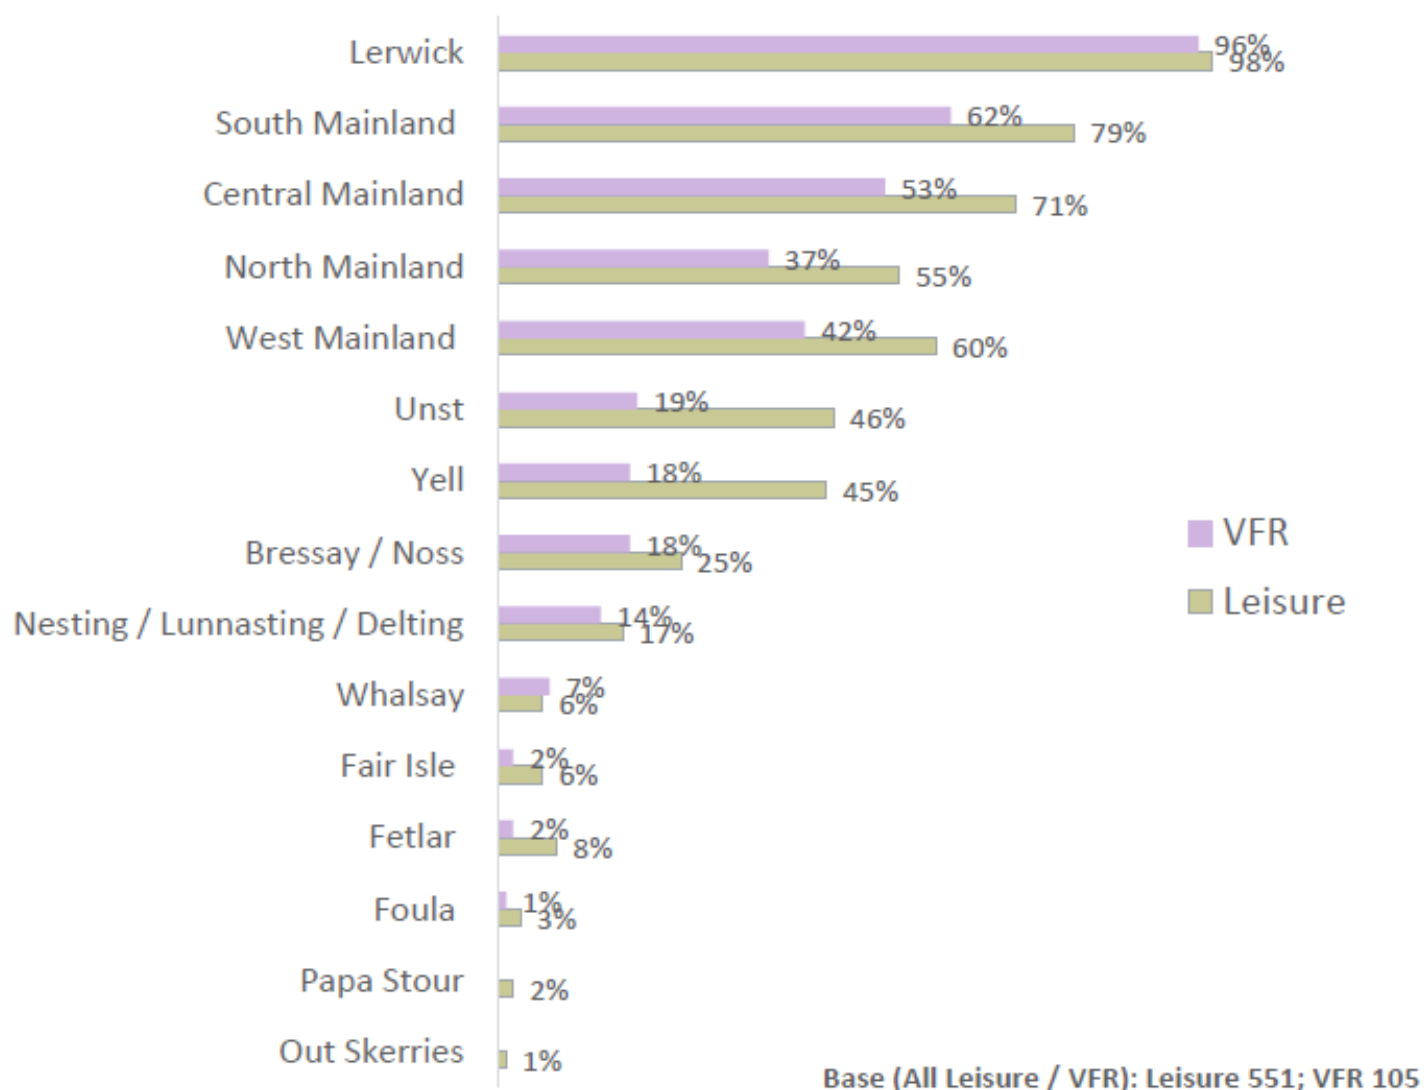

Accommodation stayed in during visit – Overnight visitors

Base (All overnight visitors): 802

Areas of Shetland visited - Leisure and VFR visitors

Sullom Voe Oil Terminal

The terminal is situated at Calback Ness on a site of approximately 400 hectares (1,000 acres) on the shores of Sullom Voe, 46km (29 miles) north of Lerwick. Historically operated by BP Exploration Operating Company on behalf of companies participating in the regional pipeline groups, the terminal's operation was passed to mature asset specialist EnQuest in late 2017. The terminal has a throughput design capacity of 1.2 million barrels of crude oil per day, and reached a peak in 1984 with a total receipt of 439,434,656 barrels (58,328,785 tonnes). Although throughput has declined in recent years, the terminal remains strategically important for the UK oil and gas industry and has the potential to handle output from new oilfields developing to the west of Shetland.

The Shetland Gas Plant (SGP) is located on the north coast of the mainland of Shetland, adjacent to the Sullom Voe Oil Terminal. It is 45 kms (28 miles) north of Lerwick and occupies an area of approximately 78 hectares (192 acres.)

The plant is able to process 500 million cubic feet of gas per day – greater than the volumes produced from Laggan-Tormore today. The SGP will act as a hub, enabling the development of other gas fields in the West of Shetland play. The UK Government estimates that as much as 17% of the UK's undiscovered gas reserves are located West of Shetland. The SGP will help bring that gas to the country's grid.

Gas arrives at the SGP through two pipelines, each 18" in diameter. When gas arrives at the plant, liquids are removed in the slug catchers before the gas is dried, chilled, re-heated and metered. It is then sent via a 30" export pipeline to join the existing 32" diameter Frigg UK Association (FUKA) pipeline system to the St Fergus Gas Terminal, north of Aberdeen, where the gas enters the main UK grid. Condensate produced by the process at the SGP is transported to EnQuest's neighbouring Sullom Voe Oil Terminal via an 8" diameter pipeline.

In August 2017, the Edradour and Glenlivet fields came on stream, both tied into the Laggan-Tormore lines, bringing up to 56,000 barrels of oil equivalent per day of additional production capacity.

THIRD SECTOR

There are approximately 1,000 voluntary and Community and Third Sector organisations in Shetland of which 280 are registered charities. There is a strong tradition of self-help and volunteering and almost all community and social activity in the rural areas relies on volunteers to make it happen.

This sector is important both in social impact and economical benefit to the Shetland economy. Community activity and the innovative and vibrant sector show the valuable role communities and the sector makes to community priorities. A survey in 2011 stated that Third Sector generates value across a number of areas including community engagement, improved wellbeing, skills development, employment opportunities and leveraging in additional finance.

Voluntary Action Shetland is the recognised interface for Shetland that has the representative role for community planning in Shetland. Voluntary Action Shetland is owner of the voluntary sector hub, Market House.

Shetland.org

“

There's actually so much to do, and not just the obvious outdoor stuff like cycling, walking or kayaking. There are yoga classes, fencing classes, MMA, squash, you name it. Just about anything you'd find in a big city, you'll find it here, it's just that you don't have to book. I'm busy all the time.

”

Akshay Borges
