

Building Standards Workshop

Remote Verification Inspections (RVIs)

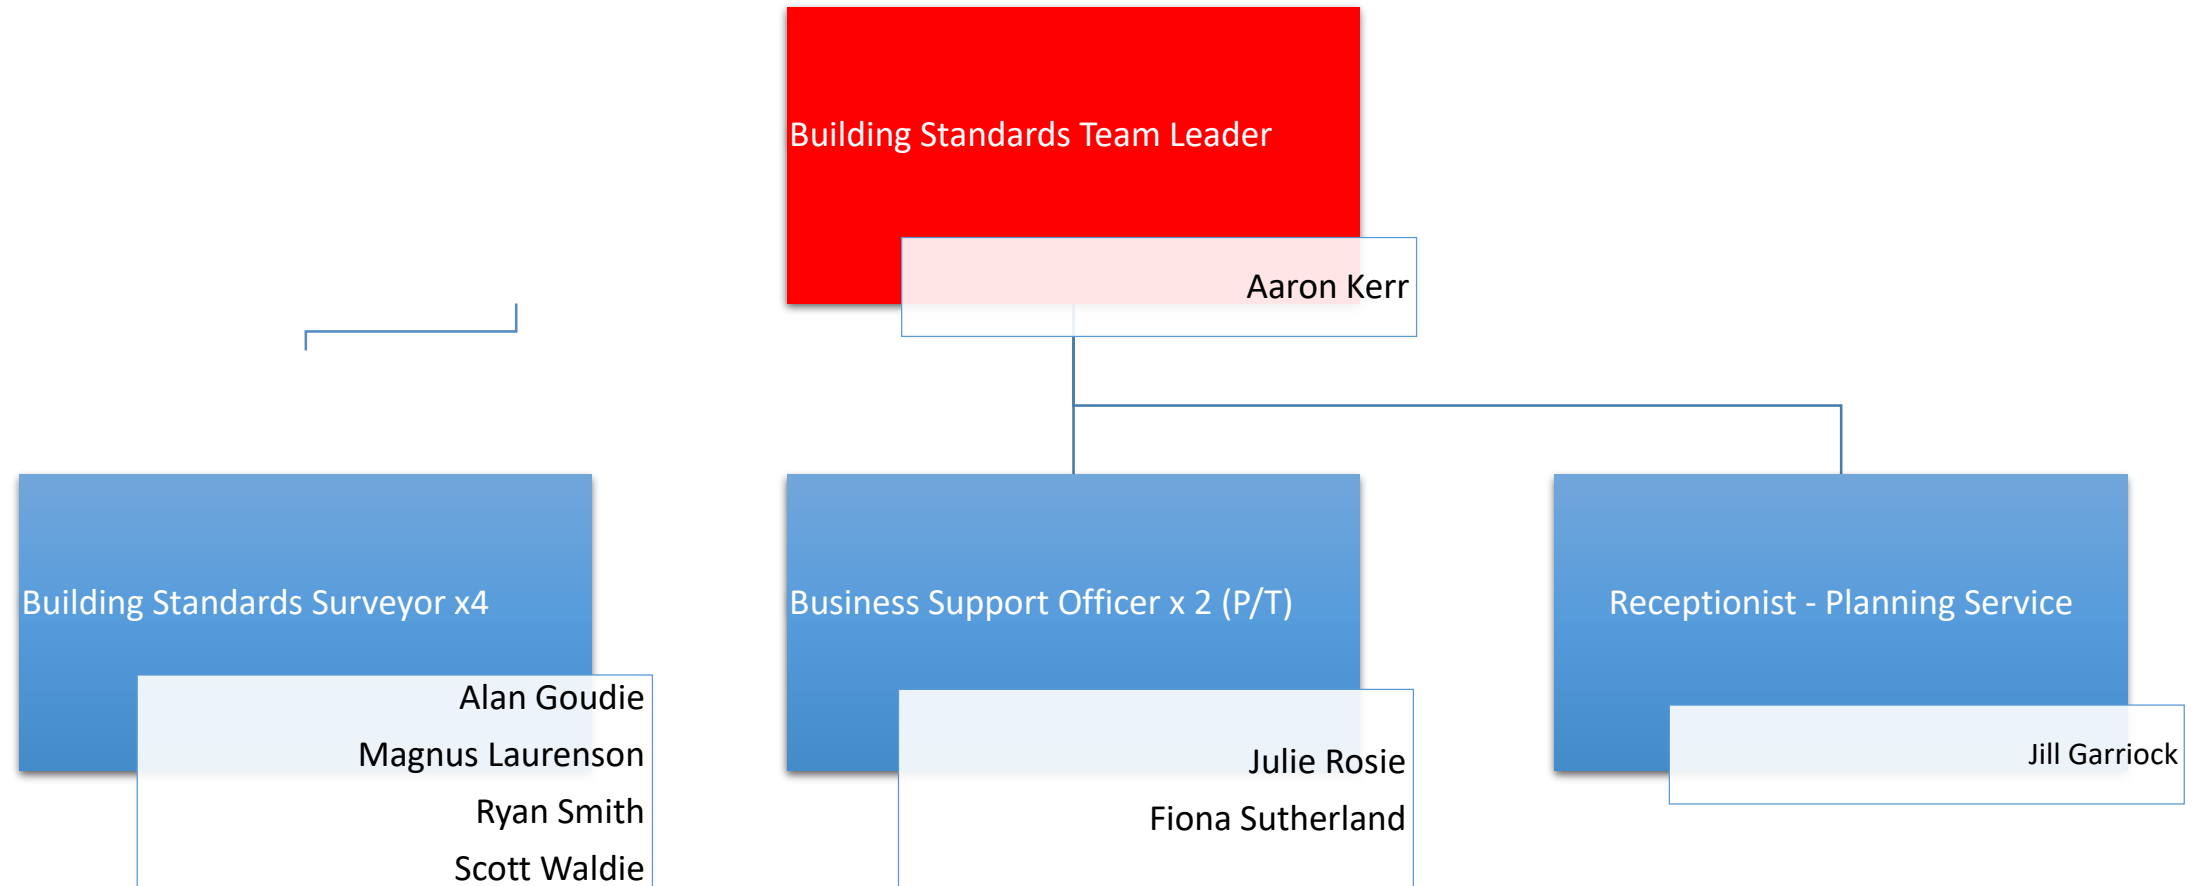

Meeting format

- How Building Standards fits within the organisation
- The Building Standards Team
- What are Remote Verification Inspections?
- Demonstration on how it works in practice.
- Discuss limitations and benefits
- Questions
- 1 hour

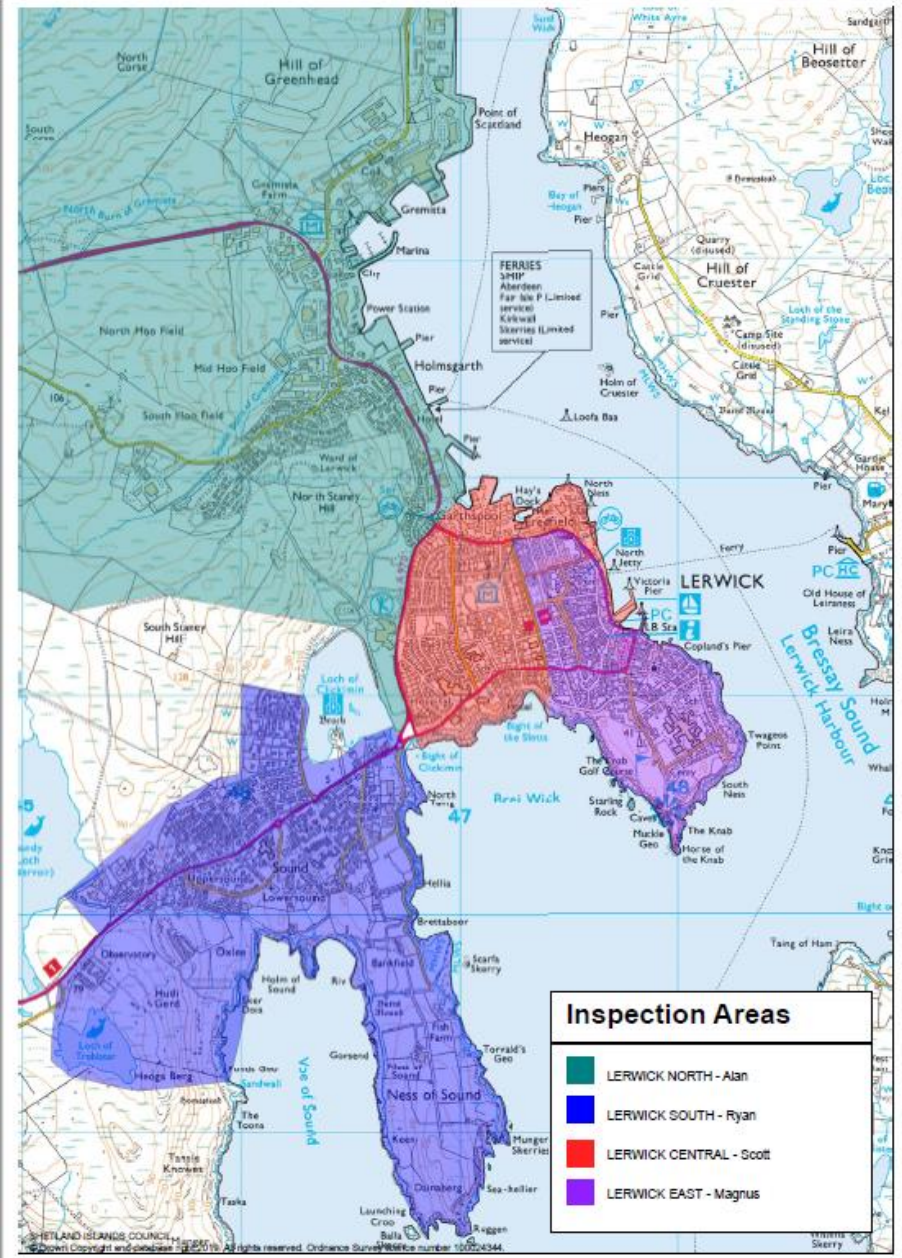

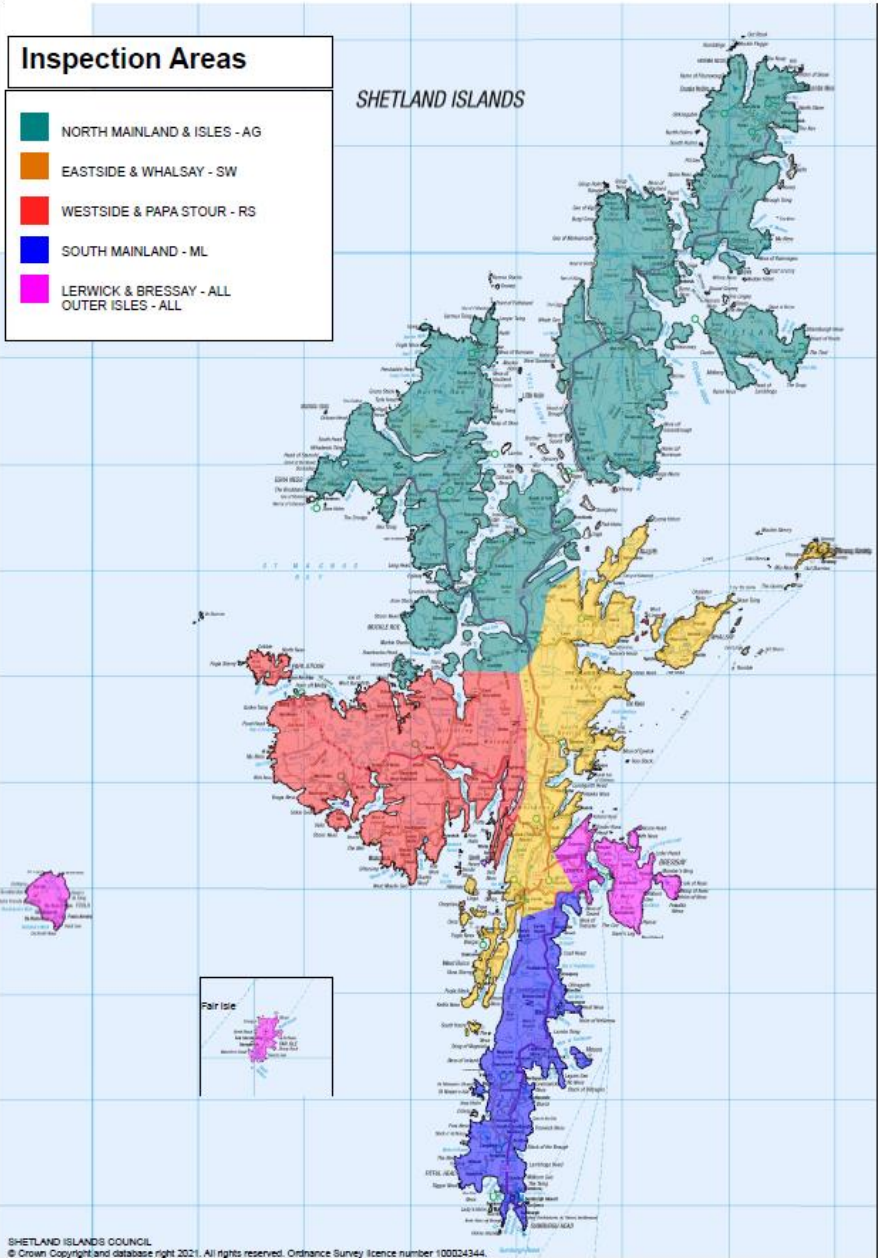

Organisation chart

Building Standards Team

Area Based Inspections

Remote Verification inspection

- Verification of the compliance of building work
 1. Checking and approving warrant plans
 2. Undertake reasonable inquiry to verify that works comply with approved plans, details and with regulations (Typically a physical inspection is carried out)
- Covid 19 Pandemic has caused us to rethink how the service is delivered.
- Kevin Stewart MSP issued guidance to all LA's to encourage use of RVI
 - May 2020
 - March 2021

Remote Verification inspection

- RVI refers to live video inspections in the first instance.
- Nature and frequency of inspections are defined by the Customer Compliance and Notification Plan (CCNP).

Typical CCNP For a Dwelling

- Nothing has changed – Responsibility still to notify AND agree with verifier what is required.
- RVI is now an additional option in lieu of a physical inspection in some instances

Key Construction Stage	Status	Notes for Applicant	Appropriate Alternative Evidence
Commencement	Mandatory	Send commencement to Verifier at least 7 days prior to starting on site	
Foundations	Notify	Excavation prior to concrete being poured	Report from structural engineer
Drainage/Substructure	Notify	Building Standards to witness drainage testing before being backfilled / walls erected to ground floor wall plate level	
Superstructure	Notify	Timber-frame erected but before covered by insulation / plasterboard	
Completion	Mandatory	Submit Completion Certificate and any relevant paperwork. No occupation of building before completion accepted (see notes).	

RVI

- What will this look like in practice?

CCNP Notificaton

1. You should contact Building Standards to give notification of CCNP stage. This can be done through any of the following ways:
 - E Building Standards Portal,
 - Email,
 - Telephone.
2. A Surveyor will then contact you to arrange the inspection.
3. If RVI is chosen, a suitable time for the inspection will be agreed between the Surveyor and yourself.
4. An appointment will be sent out to your email address in the form off a calendar appointment.

Microsoft Teams

We envisage using Microsoft Teams to carry out RVI

- Now becoming a familiar programme,
- Familiar video calling features to the likes of WhatsApp and face time
- Ability to record meetings,
- Ability to facilitate a meeting with multiple people.

How will an RVI be set up?

Preparing For The Inspection

Familiarise yourself with APP

Items you may need:

- Level
- Tape
- Torch
- Ladder or step ladder
- A Selfie Stick (Believe it or not)

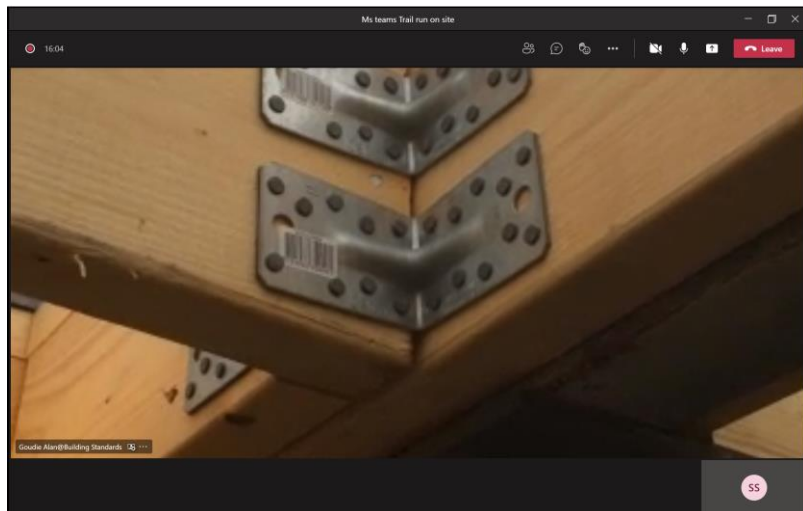

Carrying Out The Inspection

It is important to know that all RVI's will be recorded so that a record can be kept of the inspection.

The Surveyor will explain what they will need to see during the inspection

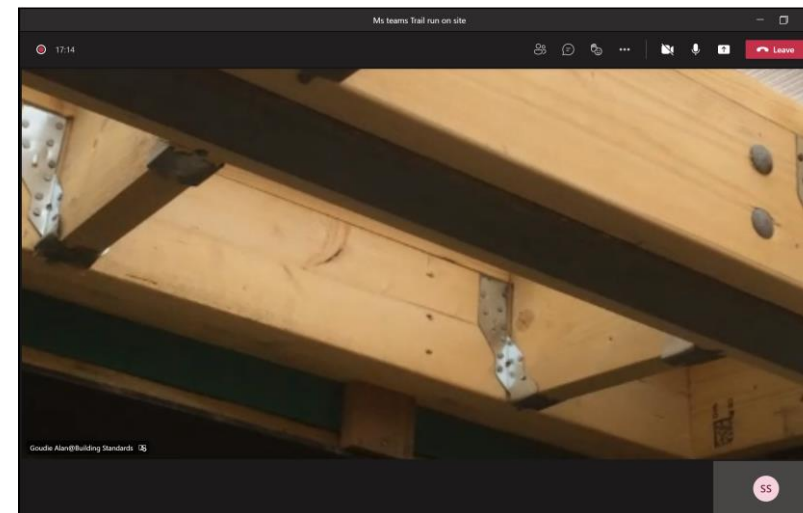

- Foundations:
Width / Depth / Steel Fabric.
- Drains:
Pipe runs, Lintels.
- Super-Structure:
Size of lintels, Depth of joists, Thickness of insulation.

Test RVI – Example Photos

Potential RVI limitations

- **Buy in to RVI's**
- **Connectivity**
- **Hardware/Software**
- **Large File sizes/Image quality**
- **Risk category of Works**
- **Trust**
- **Instructions/Guidance**

- **Disadvantages** – Loss of adhoc discussion on site, potential for more unauthorised works, from the submission of recorded Video & Photos potential for work on site to continue without being verified.

Potential RVI Advantages

- **Reduced Covid-19 risks**
- **Inspections dealt with in a timely manner**
- **Better Flexibility to attend RVI**
- **Inspect different geographical areas in the same day**
- **Allows more inspections during the construction works on site**
- **Savings**
- **Bad weather**

Q&A's

What is your thoughts on RVI's?

Limitations

- Buy in to RVI's
- Connectivity
- Hardware/Software
- Large File sizes/Image quality
- Risk category of Works
- Trust
- Instructions/Guidance

Advantages

- Reduced Covid-19 risks
- Inspections dealt with in a timely manner
- Better Flexibility to attend RVI
- Inspect different geographical areas in the same day
- Allows more inspections during the construction works on site
- Savings
- Bad weather
