Fair Isle Ferry Replacement project

Civils Infrastructure Construction Market Engagement Events

Shetland Islands Council is seeking feedback from contractors and suppliers, to inform the procurement strategy, for the civil engineering and marine infrastructure works on the Fair Isle Ferry Replacement Project.

The development locations are at Grutness, Shetland Mainland and North Haven, Fair Isle. The required works at both sites include dredging, pier extensions/maintenance and the provision of Ro-Ro linkspans. North Haven in Fair Isle also requires a new winch house, replacement boat cradle and rails, and enlargement of the existing Noust.

The Council would like to invite interested parties to two Market Engagement Events at:

- Lerwick Town Hall on Tuesday 27th June 2023, 9am 2pm
- Edinburgh (venue to be confirmed) on Wednesday 5th July 2023, 9am 2pm

Events will include:

- Introduction to the Project Management team
- Project overview focused on the current design proposals
- Discussion on timelines and key project risks
- Q&A session

Tea/coffee and lunch will be provided at both events.

The Edinburgh venue will be confirmed in due course and further materials will be circulated to attendees prior to the event.

To help plan for numbers, anyone planning to attend is asked to confirm their interest by emailing the Fair Isle Ferry Replacement Project team at <u>fairisleferryproject@shetland.gov.uk</u>
